PROFILE

Frontend developer with 5+ years of frontend development experience. Build React and TypeScript applications for fintech and banking products. Lead a frontend team of four while remaining hands-on. Delivered an insurance frontend from scratch in 1.5 months; the production service now sells more than five insurance products. Use AI tools in day-to-day development, with responsibility for reviewing the final code.

TECHNICAL SKILLS

React, TypeScript, JavaScript, Zustand, TanStack Query (React Query), Redux Toolkit, Vue 3, Nuxt, HTML, CSS, Git, FullCalendar. Reusable components, responsive interfaces, state management, API integration, code review, mentoring and AI-assisted development.

EXPERIENCE

RSHB-Intech | Frontend Developer / Frontend Tech Lead responsibilities

August 2024 - Present

- Lead a frontend team of four in the Segment Services and Additional Products cluster; own frontend quality through code review, technical decisions and mentoring. Support requirements analysis and functional verification when needed.
- Built the insurance frontend from scratch in 1.5 months using the corporate UI library; created a reusable Layout component as the foundation for subsequent interface development.
- Delivered the insurance service to production, supporting sales of more than five insurance products; contributed to the implementation and launch of travel insurance.
- Modernized the insurance frontend with Zustand and TanStack Query (React Query), making it one of the company's first adopters of this stack for client state and server data.
- Implemented more than 50% of the appointment booking service and built a reusable FullCalendar wrapper tailored to business requirements.
- Implemented more than 50% of a finance CRM; optimized component rendering and API interactions. Refactored a business CRM to improve typing, remove duplicated logic and simplify maintenance.
- Rebuilt the partner programs frontend. Implemented more than 50% of a responsive website builder, including template management and section editing; integrated social profiles in a Vue/Nuxt builder.

Sberbank | Frontend Developer

February 2022 - May 2024

- Built user interfaces and reusable UI components with React, Redux and TypeScript for internal banking applications.
- Participated in product sprints, daily meetings and retrospectives; maintained documentation in Confluence.
- Tested the new Parus application and trained users during its adoption.

Sberbank | Earlier engineering and operations roles

March 2014 - April 2023

Held specialist, chief engineer and expert roles in banking operations and technical support.

EDUCATION

- TOP IT Academy (formerly STEP), Tula - Full-stack web development.
- Tula State University - Economics and Management in Mechanical Engineering.
